Nxpy Ccase Documentation

Release 1.0.0

Nicola Musatti

Oct 21, 2018

Contents

1 `ccase` - An API for the ClearCase version control tool 3

2 `ccase.test` - Test utilities for the `ccase` package 5

3 Indices and tables 7

Python Module Index 9

Nxpy Ccase provides a Python wrapper for `cleartool`, the ClearCase command line utility.

CHAPTER 1

`ccase` - An API for the ClearCase version control tool

Tools and utilities related to the ClearCase software configuration management product.

1.1 `cleartool` - Wrapper class for the cleartool utility

CHAPTER 2

ccase.test - Test utilities for the ccase package

Test utilities for the *ccase* package.

2.1 env - Test environment definition

It is being developed with Python 3.7 so as to be compatible with Python 2.7. Tests are run also with 3.4, 3.5 and 3.6. It may still work with versions as early as 3.2 and 2.5, but they are not tested.

Originally the library was part of the Nxpy project and resided on SourceForge. Starting from release 1.0.0 it is being packaged separately and it is hosted on GitHub.

The Nxpy logo was drawn by Claudia Romano.
